

ALABASTER PROJECT

VOLUME 21 NO.02

JULY 3, 2021

A LIFE SAVING SERVICE AND A LIFE GIVING MESSAGE

We are excited to offer an additional service in our clinics. Patients who come to Bethany Village for medical help can now have their blood glucose tested. Diabetes has become more prevalent in Ghana in recent years. Many people are not aware of this disease and how fatal it can be if not monitored. Of course, for most people it will be the first time in their lives to *have* this test done. As with all our services, this is another opportunity to share the gospel of Jesus Christ with those who have not heard.

Blood Glucose Chart			
Mg/DL	Fasting	After Eating	2-3 hours After Eating
Normal	80-100	170-200	120-140
Impaired Glucose	101-125	190-230	140-160
Diabetic	126 +	220-300	200 +

MINISTRY BUILDING

The largest building in Bethany Village is the ministry building. It is our main hub for training and conferences. The first floor was completed about 7 years ago. Completion of the second floor will double our capacity to accommodate large gatherings.

CALLED TO BE A BLESSING

Nothing is more fulfilling in life than to help someone less fortunate than oneself. There is a joy that nothing else in this world can give that is more satisfying. Over the years we have disciplined many young people to follow

John, one of the disciples, has answered the call to become a missionary to an unreached people group.

the teachings of Jesus. This means that they are not only to share the gospel but they should also help those in need, Gal. 2:10. We have been obedient to the calling which our Lord gave us and that is to: "Go and make disciples". Many of the disciples in the northern region of Ghana have become pastors, teachers,

nurses, school administrators, politicians, not to mention, lay dentists and eye care specialists. After more than 20 years, often someone will come and thank us for helping them along the way, by sharing the gospel with them.

FARM AND ANIMAL HUSBANDRY

The widows have been diligent with the goat rearing project. Each time their goats bear a female there is much rejoicing. However, recently it would appear their goats are producing unusual numbers of male kids!!

These two widows, Memunatu and Ayisha, are wise. They sold their male goats and used the proceeds to purchase food. It is a win-win situation. Alabaster Project has plans to give additional female goats to those widows who have lost their goats due to unfortunate circumstances— theft and accidents.

GENERATOR, EQUIPMENT AND SUPPLIES

Reliable electrical power is essential to good health care. We had prayed and hoped to purchase a power generator for our new mission base for some time. Last May 2021 the Lord provided the funds to acquire a very good power generator. This generator is twice the capacity of the one at our Ghana base. The capacity is enough to power both clinics and the whole mission base. We are thankful to the Lord and to those through whom He provided this essential equipment. In addition to the generator, we also received numerous donations of dental chairs, instruments, an autoclave, an ophthalmic microscope, slit-lamp and other equipment and

supplies for the dental and eye clinics we are establishing in North Africa. Lord willing we will ship a 40 ft container to North Africa during the month of September. This area is an unreached territory; and we are excited to bring the good news of salvation through Jesus Christ to this part of the world. We thank God for the favor He has given us to be able to accomplish what He has called us to do.

We humbly ask for your continued prayers for those who will hear and accept God's plan of salvation.

Words cannot express our gratitude to those who have generously given of themselves and their resources to help bring the message of life to those who have not yet heard.

BETHANY LEARNING CENTER

Alabaster Project Ministry is still in need of an early childhood education (Pre-school) teacher. This opportunity is available on short term (three months) or long term (multiple years) bases. We would prefer someone with a minimum of 2 years experience and/or an undergraduate degree in early childhood education.

Those interested should contact

Alabaster Project for further details.
